About

Full Stack Developer with hands-on experience developing enterprise web applications using React.js, Next.js, TypeScript, Java, Spring Boot, REST APIs, MySQL. Experienced in building reusable responsive interfaces, integrating backend APIs, implementing role-based application features, testing and debugging, and collaborating through the software development lifecycle.

Education

Skn Sinhgad Institute Of Technology And Science Lonavala
BE in Computer Science
2021 – 2024 | **Aggregate:** 7.83(CGPA)

Arts, Science and Commerce College Rahuri
HSC (Science) | 2019 – 2020 | **Percentage:** 61%

Savitribai Phule Madhyamik Vidyalaya, MPKV Rahuri
SSC | 2017-2018 | **Percentage:** 87%

Technical Skills

Frameworks: Next.js, Spring Boot

Frontend Technologies: HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, React.js

Backend Technologies: Java (Core Java, OOP Concepts), JDBC, Hibernate, Servlets, RESTful APIs

Database Technologies: SQL, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Eclipse IDE, VS Code

Experience

Frontend Developer

Tech Tech Pvt. Ltd., Pune | Feb 23, 2026 – Present

- Contributed to the development and enhancement of a scalable enterprise management web application using Next.js, TypeScript, Tailwind CSS, and REST APIs.
- Developed responsive and reusable UI components, implemented new features, and enhanced the user experience while following modern frontend development practices.
- Performed unit testing, debugging, and issue resolution to improve application stability, performance, and code quality.
- Collaborated with cross-functional teams to analyze requirements, integrate backend APIs, participate in code reviews, and deliver production-ready features.
- Currently contributing to the next-generation version of the application by developing new modules, optimizing existing functionality, and supporting the modernization of the frontend architecture.

Java Developer Intern

Robowaves, Pune | Feb 2025 – Aug 2025

- Developed Java-based real-time applications with Hands-on experience.
- Designed and integrated backend and frontend components to create scalable, user-friendly systems.
- Ensured coding best practices, clean architecture, and deployment on AWS.
- Collaborated with the team throughout the full Software Development Lifecycle (SDLC) using Agile Scrum practices, with a focus on quality and maintainability.
- Collaborated with peers to troubleshoot, test, and enhance key features.

Projects

Store-Rating Web App

- Developed a full-stack web application using Spring Boot, MySQL, and React.js that enables users to submit ratings (1–5) for registered stores.
- Implemented a role-based login system supporting System Administrators, Normal Users, and Store Owners with tailored dashboards and functionalities.
- Admins can manage users and stores, view detailed listings, and apply filters.
- Users can register, browse stores, submit or update ratings, and owners can monitor ratings and view users who rated their stores. The application features responsive UI, search, and secure password management.

Broadband-Fibernet Billing System

- Built a desktop application using Java for broadband service for users.
- Integrated MySQL database using JDBC for dynamic data fetching, managing billing, user data, and service queries.
- Designed a clean, modular GUI with navigation menu and user actions for payment processing, plan upgrades, and customer support.
- Automated GST and late fee calculations in the billing module.
